

CGU Work from Home VPN Connection

Windows Guide

The Work from Home VPN allows you to remotely access on-campus only network resources such as Network File Shares using any Windows computer, either personal or CGU issued. Note that the VPN is not required to access online resources such as MyCampus, Email, OneDrive, and Canvas. This guide will show you how to install the VPN and connect to it on a Windows computer.

Installing VPN Client

1. Open a web browser and connect to <https://vpn.cgu.edu/>
2. Select your WorkFromHome GROUP dropdown box.
3. Enter your CGU Username & Password
4. Click Login

A screenshot of a web browser window titled "Login". The window contains a form with the instruction "Please enter your username and password." Below this, there are three input fields: "GROUP:" with a dropdown menu showing "WorkFromHome", "USERNAME:" with the text "doej1234", and "PASSWORD:" with a masked password of 12 dots. A "Login" button is positioned below the password field.

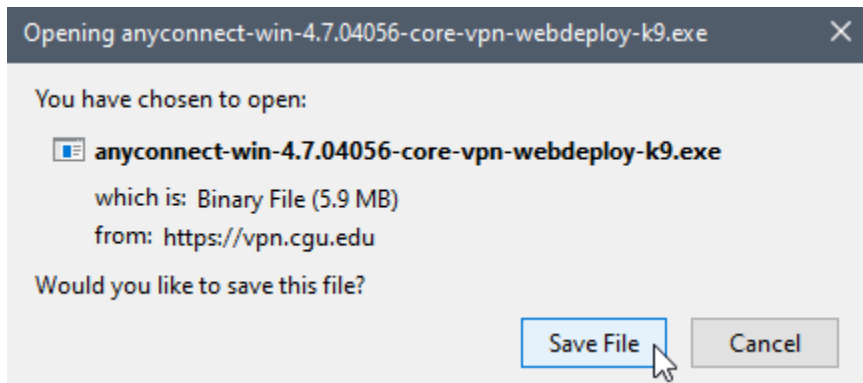

5. Click Download for Windows

Download & Install

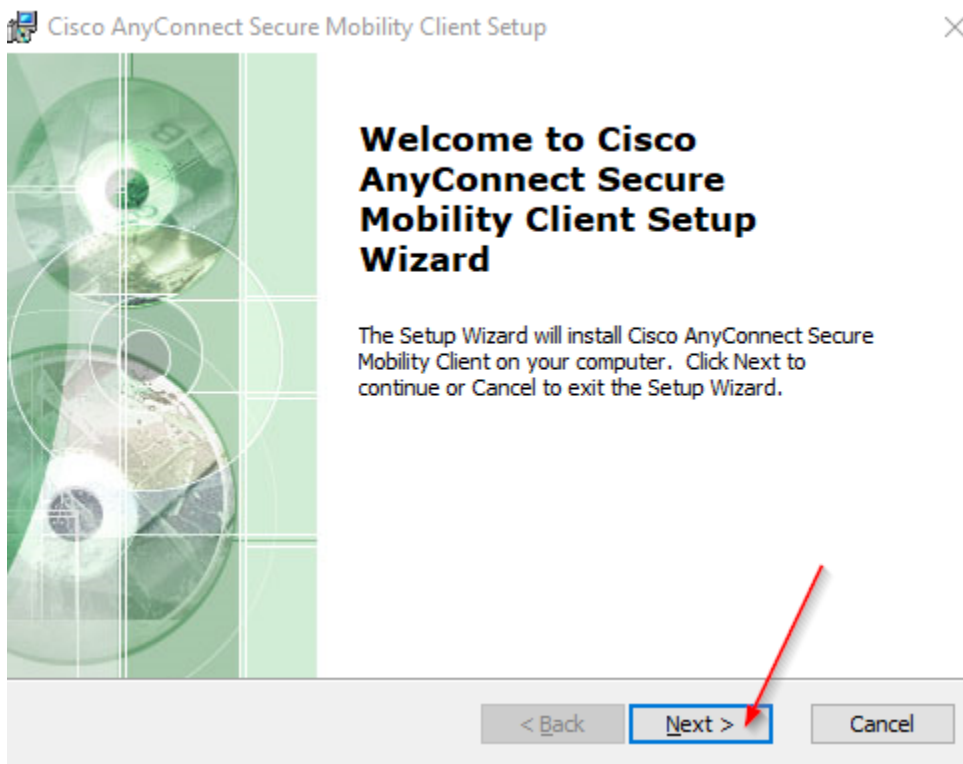

Download Cisco AnyConnect Secure Mobility Client and install it on your computer.

[Download for Windows](#)

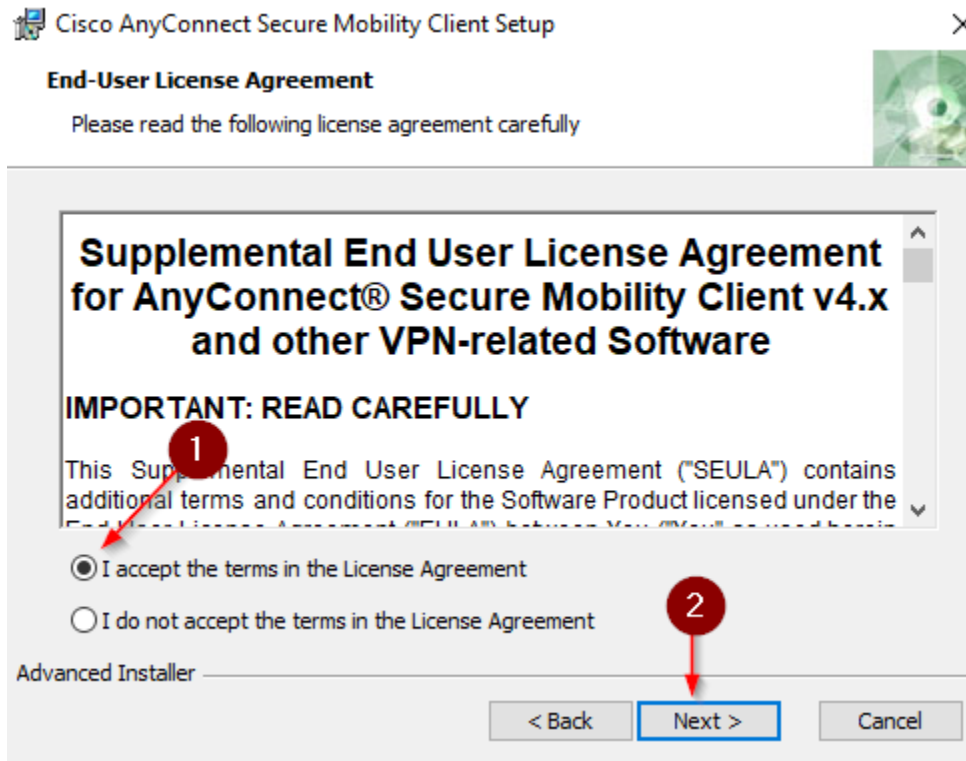

6. Save the file and run the installer.

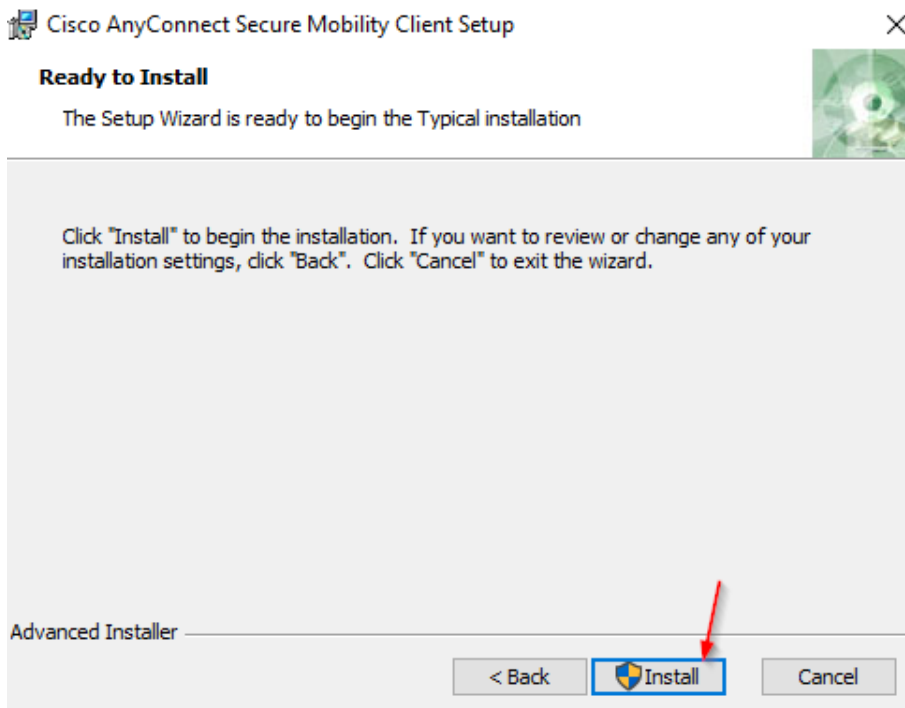

7. Click Next to begin the installation.

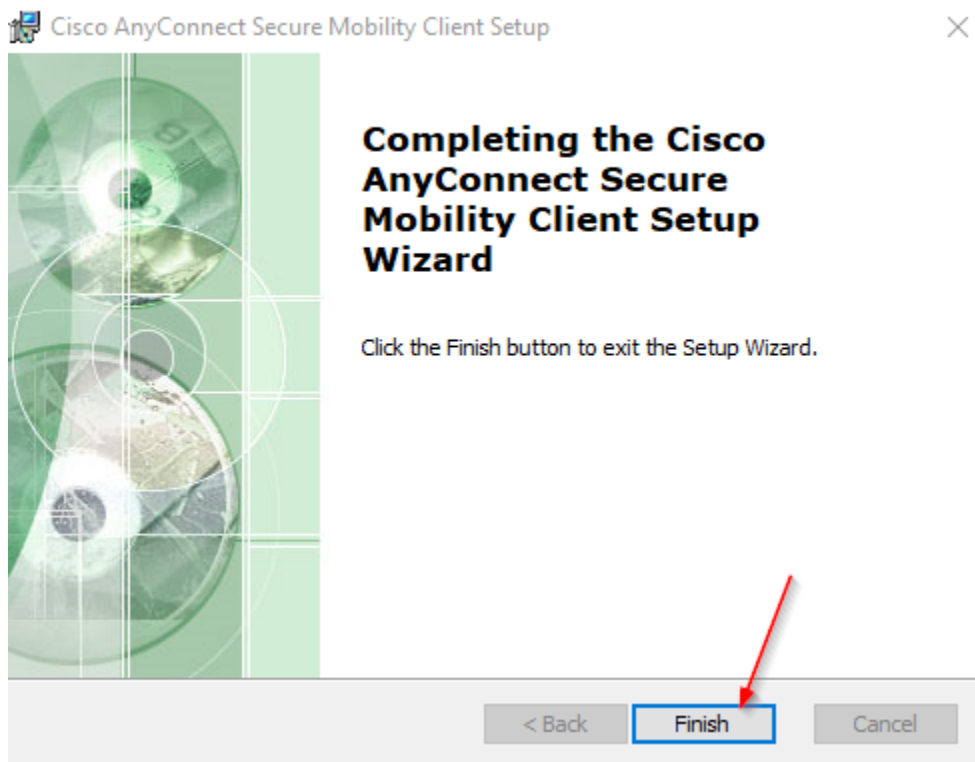

- Click Accept and then Next to continue the installation.

- Click Install, you may be prompted to enter your password and authorize the installation.

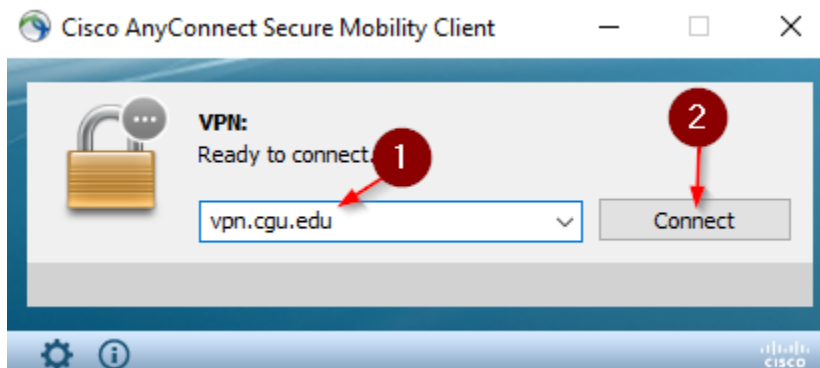

10. Click Finish to complete the installation.

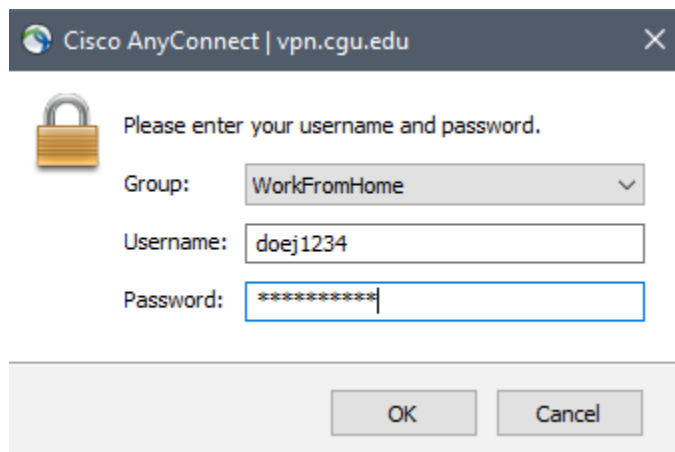

Connecting to the VPN

1. Launch Cisco AnyConnect and enter vpn.cgu.edu under the dialogue box and then click Connect.

2. A box will pop up asking for connecting information. Under the Group dropdown box select WorkFromHome. Enter your username and password, then click OK.

3. The VPN should successfully connect and then minimize.

4. To disconnect from the VPN right click on the icon in the tray and then click Disconnect.
