Powered by Duo Security

Enter a passcode from Duo Mobile. ×

When logging into a campus resource requiring DUO authentication, a prompt will ask which method to use. Two choices are available to authenticate:

1. **Duo Push:** This is the recommended method. Download the Duo app to a smart phone. The app will ask to verify a login. This is the quickest and easiest authentication method.
2. **Passcode:** This method will send a code to your connected phone from the Duo app. Enter the passcode to verify the login.

A preferred authentication method can be selected so DUO will automatically use that method when logging in. Additionally, the "Remember me for 30 days" box can be checked if several logins will be done in a day. This allows multiple logins within a day without reauthenticating using DUO.
