Using DUO with the VPN

1. Open Cisco AnyConnect Secure Mobility Client software.

2. Enter vpn.cg.edu into the window and click Connect.

3. Select the VPN group you wish to use, enter your username (not your email address) and enter your password.

4. In the Second Password field, use the following text (without the quotes) to utilize multifactor authentication.
   “push” – sends a DUO app push to your enrolled mobile phone
   “call” – calls your enrolled phone
5. Click OK and you will be prompted to complete a DUO multifactor authentication using the DUO app on your mobile phone or a call placed to your phone based on your election in the Second Password field.

DUO Apple iOS Mobile App Push Example:
