Instructions to download the ePanic Button (Version 4.0):

These are step by step instructions. You can also view an instructional ePanic Button Video

NOTE: You will need administrative rights to your computer to install the software. The ePanic button is not an Apple/ Mac version yet, but the developers are working on that.

To download click here: ePanic Button

This will appear:

Open with 🔻	
ePanicButtonSetup (V4).zip 2 items	
ISSetupPrerequisites	-
Setup.exe	

Click the download arrow on top right:

Click on the pop up on the bottom left:

This will appear:

Click on the white arrow on your task bar. Then click "customize"

A list of options will appear. Find the one that says "ePanic Button Client" which has the red panic button icon.

Only show notifications	•

Click the drop down and select "Show icon and notifications" and then click Ok

ePanicButton Client

Show icon and notifications

Then your ePanic button will appear on your task bar. You may need to restart your computer for it to appear on your taskbar.

Once installed, when you hover over your red E-Panic button on your taskbar a yellow button that says "Test" will pop up in the right corner. Click the yellow test button.

We will notify you if we received the test alert. Thank you!

Note: If your E-panic button is ever unloaded this is how to get it back on your task bar: Right

click on Start . search for ePanic button client and double click it and it appear right at bottom again.
